ARTICLES

A

Air Ventilation, Controlled .. 61–62
Al-Cu-Mg Alloy, The Effect of Quenching Strains on the Properties of an. By Dr. H. A. Unckel 220–222
Alpha-Beta Titanium Alloy, Hardness and Microstructure of an, Quenched from Temperatures in the Range 600°—1,000° C. By A. Greenwood and W. Evans 124–126
Aluminium Alloys in Royal Yacht 282
Aluminium and its Alloys in 1953 By E. Elliott 82–90
Aluminium Casting Alloy (New) Available 143
Aluminium in the Food and Chemical Industries. By R. W. Nuttall 63–70
Aluminium in the Textile Industry. By E. C. Roylance .. 77–81
Aluminium Mineral Wagon, An 141–142
Aluminium, Recent Developments in the Riveting of. By A. W. Brace 71–75
Aluminium Skyscraper 75–76
American Iron and Steel Industry, Recent Research in the 241–244
American Isothermal Heat Treatment Practice 27–33
Appleby-Frodingham, Extensions at 169–170
Arc (Electric) Steel Melting Furnace, The 119–122
Argonarc Welding Exhibition in Scotland 194

B

B.I.S.R.A. Diamond Die Profiloscope 281–282
Blast Furnace (New) Blown-in at South Ironworks. Extensions at Appleby-Frodingham 169–170
Bonding in Cermets. By Dr. L. S. Williams and Dr. P. Murray 210–217
Briquetting Press for Metal Swarf. Cast Iron Prepared for Cupola Remelting 189–190
Britannia, H. M. Yacht, Aluminium Alloys used structurally in 282
British Industrial High Frequency Induction Heating Equipment, A Survey of Applications of, and their Economic Aspect 223–229
British Industries Fair. Engineering Exhibits at Castle Bromwich 171–188
British Patent Specifications .. 188

Page

C

Carbides (Cemented), Europe's Biggest Factory 275
Casting Alloy (New, Aluminium) Available 143
Castings, The Running and Feeding of 159–164
Cast Iron Prepared for Cupola Remelting. (Briquetting Press for Metal Swarf) 189–190
Castle Bromwich, Engineering Exhibits at. The British Industries Fair 171–188
Cemented Carbides Factory, Europe's Biggest 275
Cermets, Bonding in. By Dr. L. S. Williams and Dr. P. Murray 210–217
Certification Mark Scheme for Die Castings 168
Chemical and Food Industries, Aluminium in the. By R. W. Nuttall 63–70
Cold Pressure Welding of Metals, The. By Dr. J. E. Hughes.. 15–19
Controlled Air Ventilation .. 61–62
Co-operation in Research 91–94
Corrosion, The Protection of Ferrous Metals Against .. 62
Corrosive Fume Exhaustion Equipment 142–143
Cupola and Electric Arc Furnace, Combination of. (Duplexing in the Foundry). By Francis J. Knight 137–138
Cupola Remelting, Cast Iron Prepared for. (Briquetting Press for Metal Swarf) 189–190
Cyanide Waste: Some Methods Used in the United States for its Disposal. By F. J. Knight 279–280

D

Diamond Die Profiloscope. New B.I.S.R.A. Development .. 281-282
Die Casting Certification Mark Scheme 168
Die Casting Dies, Problems and Procedures in Proving. By W. M. Halliday. 230–234
Die Castings (Pressure), Faults in. By W. M. Halliday... 35–40, 55–60
Duplexing in the Foundry. By Francis J. Knight 137–138

E

Electrical Plant for the Metal Industries. Progress in 1953 Reported 127–133
Electric Arc Furnace and Cupola, Combination of. (Duplexing in the Foundry). By Francis J. Knight 137–138
Electric Arc Steel Melting Furnace, The 119–122
Electric Furnaces, Molybdenum-Wound. Calculation of Winding Dimensions. By A. B. Ashton 191–194
Electrode Development and Manufacture. New Quasi-Arc Laboratories at Bilston .. 246–248

Page

Engineering Exhibits at Castle Bromwich. The British Industries Fair 171–188
Evolution of Hydrogen from Weld Metal. By Dr. K. Winterton and Dr. C. L. M. Cottrell 3–7
Exhaustion Equipment, Corrosive Fume 142–143

F

Faults in Pressure Die Castings. By W. M. Halliday .. 35–40, 55–60
Feeding and Running of Castings, The 159–164
Ferrous Metals, The Protection of, Against Corrosion 62
Flame Radiation Research International. New Experimental Station at IJmuiden 265–270
Flash Smelting, Tonnage Oxygen for 126
Food and Chemical Industries, Aluminium in the. By R. W. Nuttall 63–70
Foundry College, The National 139–140
Foundry, Duplexing in the. By Francis J. Knight 137–138
Fume (Corrosive) Exhaustion Equipment 142–143
Furnace Developments. Recent Installations for Ferrous and Non-Ferrous Metals 283–300
Furnaces (Electric), Molybdenum-Wound. Calculation of Winding Dimensions. By A. B. Ashton 191–194
Furnace, The Electric Arc Steel Melting 119–122

G

Gas Atmospheres (Protective) for the Heat Treatment of Metals, A New Apparatus for Producing. (The Nitroneal Generator) 134
G.E.C. Heavy Alloy Production 276–278
Generator, The Nitroneal 134
Grinding Hazards. By W. R. Hardwick 21–25

H

Hardness and Microstructure of an Alpha-Beta Titanium Alloy Quenched from Temperatures in the Range 600°—1,000° C. By A. Greenwood and W. Evans 124–126
Hazards, Grinding. By W. R. Hardwick 21–25
Heat Treatment Furnace Developments. Recent Installations for Ferrous and Non-Ferrous Metals 283–300
Heat Treatment, Isothermal .. 27–33
Heat Treatment of Metals, A New Apparatus for Producing Protective Gas Atmospheres for the. (The Nitroneal Generator) 134

Page

Heavy Alloy Production. New Plant in Operation at G.E.C. 276–278
High-Frequency Induction Heating Equipment (British Industrial), A Survey of Applications of, and their Economic Aspect 223–229
Hydrogen (Evolution of) from Weld Metal. By Dr. K. Winterton and Dr. C. L. M. Cottrell 3–7

I

IJmuiden, New Experimental Station for International Flame Radiation Research at 265–270
India, The Non-Ferrous Metal Industry in. Symposium at Jamshedpur 271–275
Industrial High Frequency Induction Heating Equipment (British), A Survey of Applications of, and their Economic Aspect 223–229
Industrial Waste (Toxic), The Disposal of. By F. J. Knight 279–280
Institute of Metals. Joint Meeting with French Society 245, 248
Institute of Metals Presidential Address. Metals and Marine Engineering 235–240
International Flame Radiation Research. New Experimental Station at IJmuiden 265–270
Iron and Steel Industry (American), Recent Research in the 241–244
Isothermal Heat Treatment 27–33

J

Jamshedpur Symposium on the Non-Ferrous Metal Industry in India 271–275

M

Marine Engineering and Metals. Institute of Metals Presidential Address 235–240
Metal Industries, Electrical Plant for the. Progress in 1953 Reported 127–133
Metals and Marine Engineering. Institute of Metals Presidential Address 235–240
Metal Supplies and Powder Metallurgy Tomorrow. By H. W. Greenwood 135–136
Metal Swarf, Briquetting Press for 189–190
Microstructure and Hardness of an Alpha-Beta Titanium Alloy Quenched from Temperatures in the Range 600°—1,000° C. By A. Greenwood and W. Evans 124–126
Mild Steel at High Temperatures, The Efficiency of Some Protective Treatments in Preventing the Oxidation of. By Dr. A. H. Sully, E. A. Brandes and R. H. Brown 165–168
Mineral Wagon, An Aluminium 141–142
Molybdenum-Wound Electric Furnaces. Calculation of Winding Dimensions. By A. B. Ashton 191–194

N

National Foundry College. New Premises Opened at Wolverhampton 139–140
Nitroneal Generator, The 134
Non-Ferrous Metal Industry in India, The. Symposium at Jamshedpur 271–275

O

Oxidation of Mild Steel at High Temperatures, The Efficiency of Some Protective Treatments in Preventing the. By Dr. A. H. Sully, E. A. Brandes and R. H. Brown 165–168
Oxygen (Tonnage) for Flash Smelting 126

P

Paper (Technical), Presenting a. By C. H. Willcocks 122–123
Patent Specifications, British .. 188
Plane Plasticity. By Dr. B. B. Hundy 109–118
Plant (Electrical) for the Metal Industries. Progress in 1953 Reported 127–133
Plasticity, Plane. By Dr. B. B. Hundy 109–118
Powder Metallurgy Tomorrow, Metal Supplies and. By H. W. Greenwood 135–136
Presenting a Technical Paper. By C. H. Willcocks 122–123
Press (Briquetting) for Metal Swarf 189–190
Pressure (Cold Welding of Metals. By Dr. J. E. Hughes 15–19
Pressure Die Castings, Faults in. By W. M. Halliday .. 35–40, 55–60
Profiloscope, Diamond Die. New B.I.S.R.A. Development .. 281–282
Protection of Ferrous Metals Against Corrosion, The 62
Protective Gas Atmospheres for the Heat Treatment of Metals, A New Apparatus for Producing. (The Nitroneal Generator). 134
Protective Treatments (The Efficiency of Some) in Preventing the Oxidation of Mild Steel at High Temperatures. By Dr. A. H. Sully, E. A. Brandes and R. H. Brown 165–168
Proving Die Casting Dies, Problems and Procedures in. By W. M. Halliday 230–234

Q

Quasi-Arc Laboratories (New) at Bilston. Electrode Development and Manufacture 246–248
Quenched from Temperatures in the Range 600°—1,000° C., Hardness and Microstructure of and Alpha-Beta Titanium Alloy. By A. Greenwood and W. Evans 124–126
Quenching Strains (The Effect of) on the Properties of an Al-Cu-Mg Alloy. By Dr. H. A. Unckel 220–222

R

Refractory Alloys, Sintered. By A. Carter 8–14
Research, Co-operation in .. 91–94
Research (Recent) in the American Iron and Steel Industry 241–244
Riveting of Aluminium, Recent Developments in the. By A. W. Brace 71–75
Royal Yacht, Aluminium Alloys in 282
Running and Feeding of Castings, The 159–164

S

Skyscraper, Aluminium 75–76
Sintered Refractory Alloys. By A. Carter 8–14
Spot Welding, Developments in. G.E.C. 4 kVA. electronically controlled spot welder 218–219
Steel Melting Furnace, The Electric Arc 119–122
Swarf (Metal), Briquetting Press for 189–190

T

Technical Paper, Presenting a. By C. H. Willcocks 122–123
Textile Industry, Aluminium in the. By E. C. Roylance .. 77–81
Titanium Alloy (Alpha-Beta), Hardness and Microstructure of a, Quenched from Temperatures in the Range 600°—1,000° C. By A. Greenwood and W. Evans 124–126
Tonnage Oxygen for Flash Smelting 126
Toxic Industrial Waste, The Disposal of. By F. J. Knight 279–280
Tungsten-carbides (Cemented), Europe's Biggest Factory .. 275

V

Ventilation, Controlled Air .. 61–62

W

Wagon (Mineral), Aluminium .. 141–142
Waste (Toxic, Industrial), The Disposal of. by F. J. Knight 279–280
Welding (Argonarc) Exhibition in Scotland 194
Welding (The Cold Pressure) of Metals. By Dr. J. E. Hughes 15–19
Weld Metal, Evolution of Hydrogen from. By Dr. K. Winterton and Dr. C. L. M. Cottrell .. 3–7
Winding Dimension, Calculation of. (Molybdenum-Wound Electric Furnaces). By A. B. Ashton 191–194

LABORATORY METHODS

Aluminium Alloy Production, Direct Reading Spectrograph for Control of 261–262
Analytical Methods for Titanium and Titanium Alloys. By J. A. Corbett 206–208
B.I.S.R.A. Photo-Electric Dust Meter 156
Bureau of Analysed Samples, Ltd. Ninth General Meeting at York 311–312
Commercial Vacuum-Melted High Temperature Alloys .. 155
Complexones (The Application of the) in Metallurgical Analysis. By E. G. Brown 101–105, 151–155
Direct Reading Spectrograph for Control of Aluminium Alloy Production. 261–262
Dust Meter, The B.I.S.R.A. Photo-Electric.. 156
Electrolytic Polishing of Microspecimens (Routine), An Improved Method for. By R. L. Hancher 47–51
Iron Determination in Ores, Slags and Refractories 106
Metallographic Examination, Mounting Thin Strips for. By A. D. Hopkins 105
Metallurgical Analysis, The Application of the Complexones in. By E. G. Brown 101–105, 151–155
Meter (Dust, Photo-Electric), The B.I.S.R.A. 156
Microspecimens, An Improved Method for Routine Electrolytic Polishing of. By R. L. Hancher 47–51
Mounting Thin Strips for Metallographic Examination. By A. D. Hopkins 105
National Physical Laboratory Extension. New Metallurgical Laboratory Opened 257–260
Ores, Slags and Refractories, Determination of Iron in .. 106
Photo-Electric Dust Meter, The B.I.S.R.A. 156
Physical Society Exhibition, Exhibits of Metallurgical Interest at the 307–310
Polishing of Microspecimens, An Improved Method for the Routine Electrolytic. By R. L. Hancher. 47–51
Refractories, Ores and Slags, Determination of Iron in .. 106
Slags, Ores and Refractories, Determination of Iron in .. 106
Spectrograph (Direct Reading) for Control of Aluminium Alloy Production 261–262
Thin Strips (Mounting) for Metallographic Examination. By A. D. Hopkins 105
Titanium and Titanium Alloys, Analytical Methods for. By J. A, Corbett 206–208
Titanium Shape Casting Licence 240
Vacuum Equipment Production. Edwards' New Works at Crawley 203–205, 208
Vacuum-Melted High Temperatue Alloys, Commercial .. 155

METALLURGICAL DIGEST

Controlling Carbide Precipitation in Welding Stainless Steel. G. E. Linnert and R. M. Larrimore, Jr. 255
Creep Resistant Ferritic Steels, New. D. D. Howat 201–201
Soldering of Aluminium. J. D. Dowd 256
Titanium, How to Descale. A. E. Durkin 256
Titanium Melting Process .. 202
